RE: IARC Study of ETS and Lung Cancer

DATE: May 21, 1993

25. Juni 1993 *Dr. Ha*  
*R. We*  
*K. H.*

Attached for your information is a copy of material recently sent to C&B-London. *K. H.*  
We have asked them, through their consultants, to try and uncover as much *E. R.*  
information as possible on the current status, etc., of the IARC study.

I would like all those who receive a copy of this memo to use whatever internal and external resources they may have or may know about to help us get more information on the IARC study as quickly as possible. For example, I have already alerted Helmut Reif that I would like him to pursue this inquiry through his contacts at the VdC and also for him to ask Mr. Marcovitch to think about his potential contacts in France and Switzerland. We would welcome any other advice or assistance that any of you could provide.
